

# Join the **Algo** Trading **Revolution**

iSystems

Available through

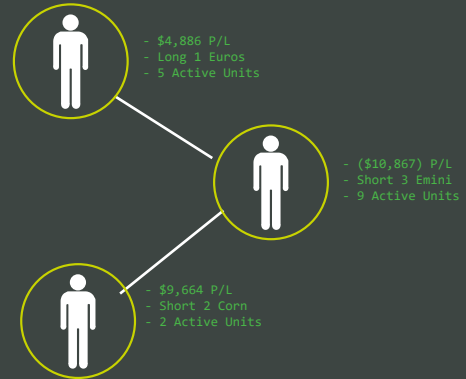

**NINJATRADER**  
Architects of Electronic Trading Innovation

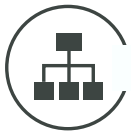

# Why isystems?

Find out how **thousands of traders** from the **U.S. to Europe** have **revolutionized** their trading **with iSystems**

**Automated**, algorithmic trading **hands-free platform**

**Access over 1000+** professionally-developed algos -- like an Algo App store

**Algos sync directly to your account** automatically -- **start & stop any time**

“...algorithms are dominating...**It's truly a 'Terminator' market.**”

- Mark Cuban

## Why Algorithmic Trading?

**NO Emotions**

**Fully Automated**

**Diversified**

**Real Money Fills**

**Forward Tested**

**Back Tested**

Trading futures, options on futures and retail off-exchange foreign currency transactions involves substantial risk of loss and is not suitable for all investors.

# Finding Top Systems

Browse all systems, Top 10 tables, & your active systems

Once a client is sent a **user ID & password**, they are **LIVE** on the platform, **they don't even need an account number**

The **customizable** performance table **lists and sorts** systems across P&L, required capital, ranking, & **dozens of additional factors**

Use **quick filters** to find **top systems**

**Build your own advanced filter logic** across **dozens** of metrics

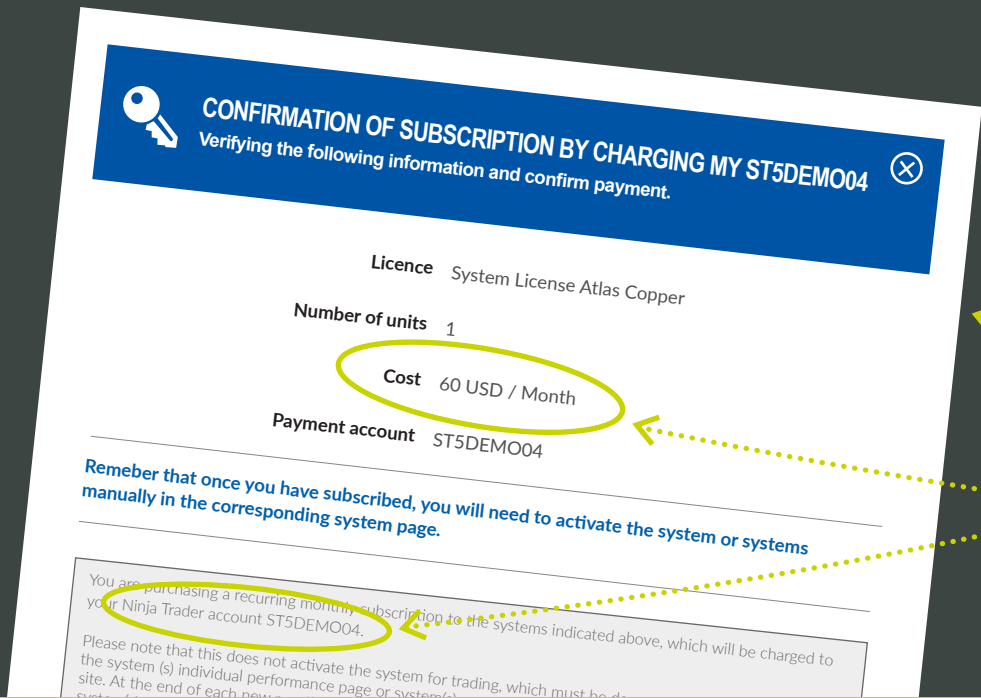

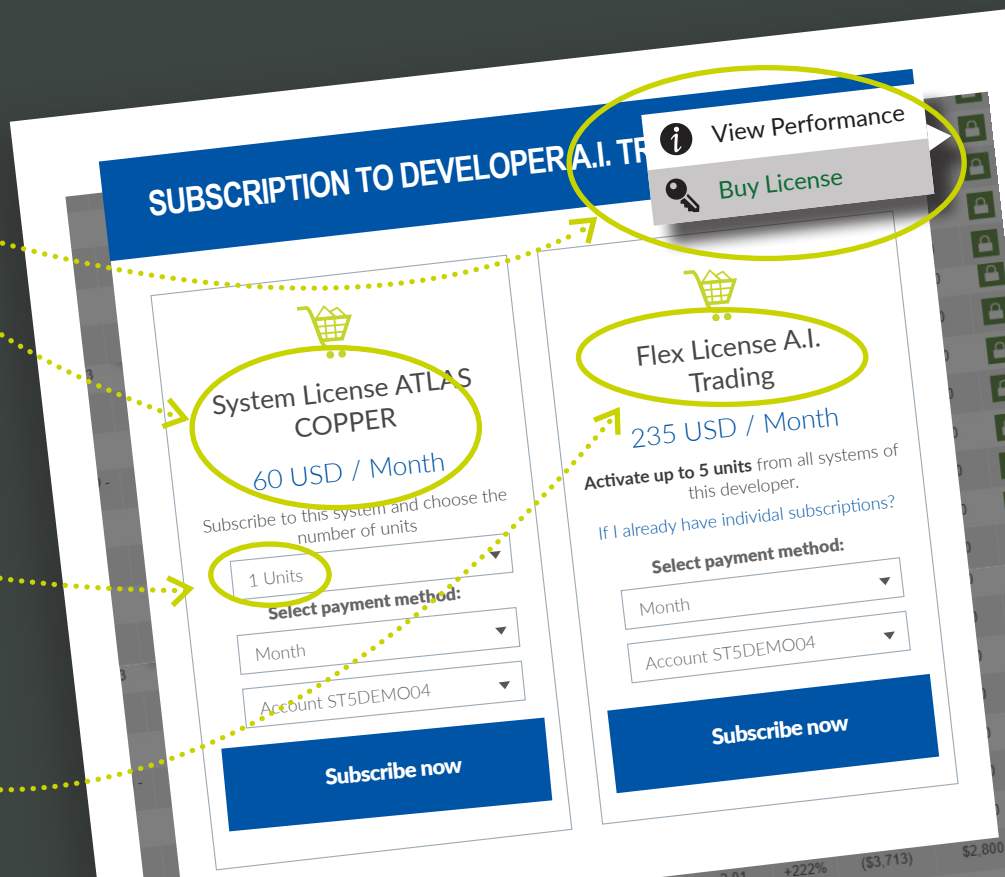

# License a system!

Clients **license the rights** to system signals **paying a monthly 'license fee'**

**Select** how many units of the system, typically, **1 unit = 1 contract / signal**

Flex license **allows for discount fees** across all developers systems

**All actions** made by the client **require a confirmation**

**This cost is deducted** from the clients account at the **beginning of each month**, for trading that month, & **prorated in the 1st month activated**

# Activating the system

Once client has the license rights to a system, **the next step is to activate** the system for their account

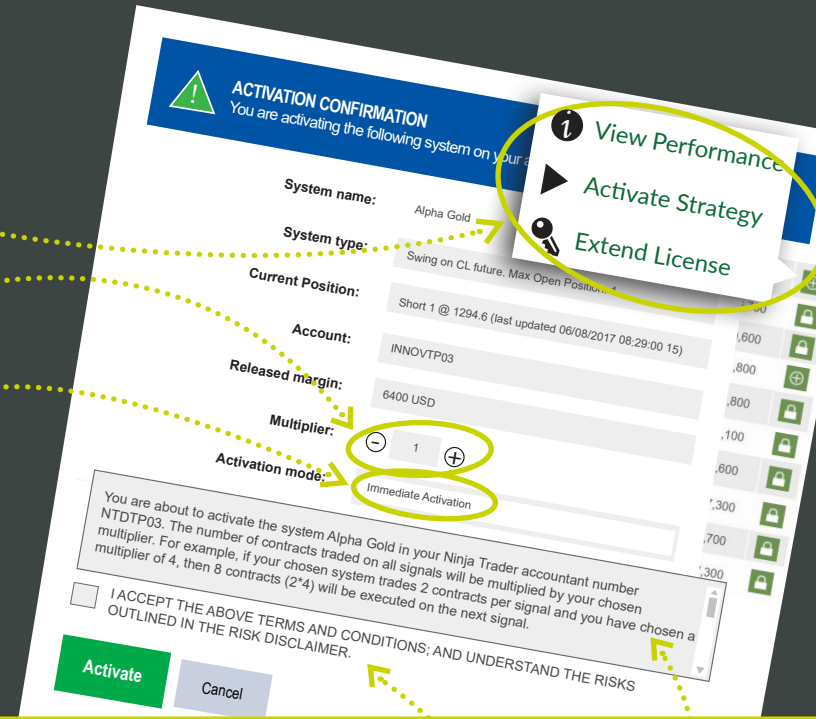

Set **how many contracts** should be traded per signal

Clients can **choose** different activation options depending on whether the system **is currently in a trade** and where the market is in relation to its **latest entry price**

### Activation mode:

#### Immediately Activation

- Immediate if better
- On Next Signal
- On Next Session

All activations on the platform require a **'double check'** of the action and disclosures **before** proceeding

All actions are followed by a **confirmation email** to the **client & broker**

# Deactivate Anytime

Clients **have complete 24/7 control**, with ability to start, **stop** or change systems **at any time**

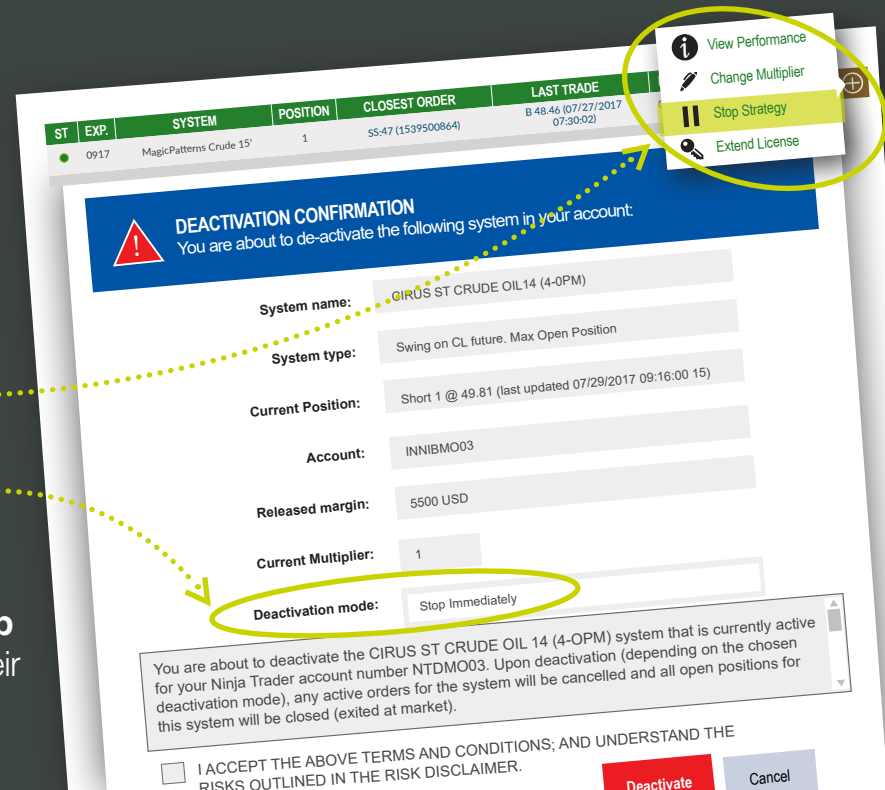

All client's **can stop a strategy at anytime**

### Deactivation mode:

#### Stop Immediately

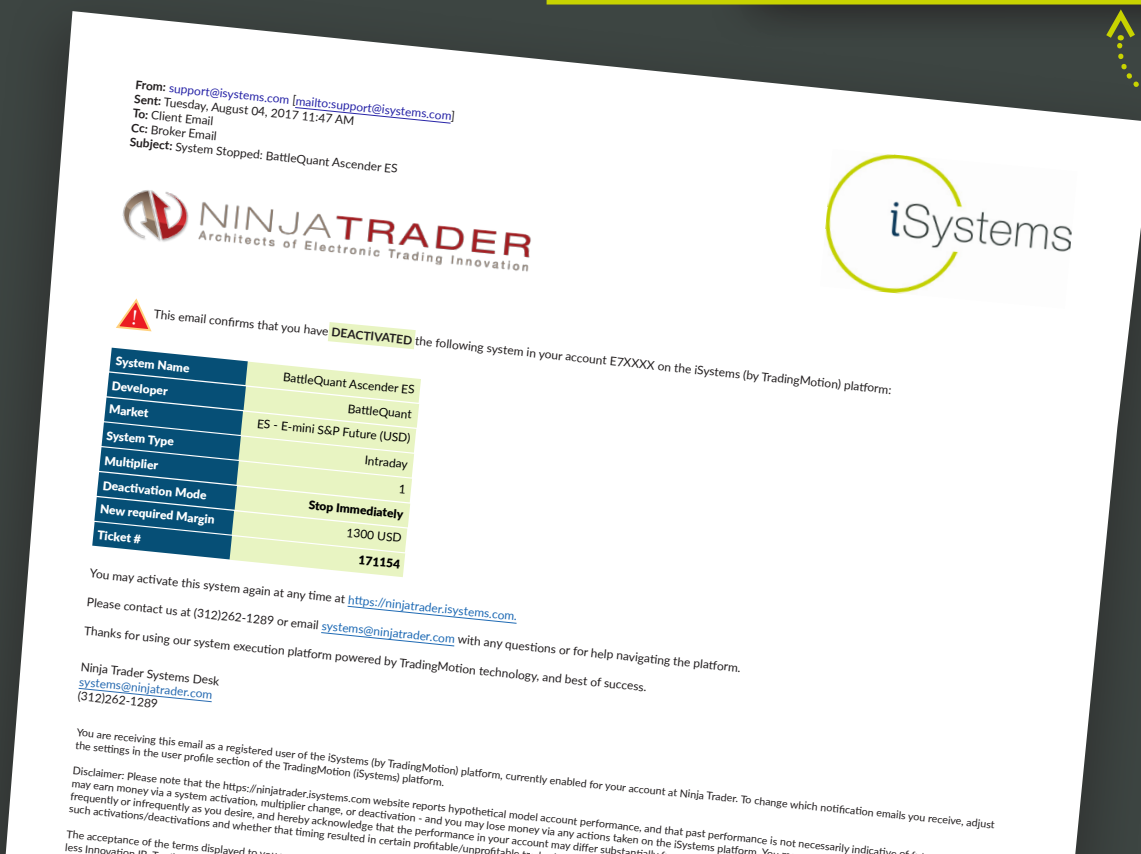

Do not take more entries after current position is closed

Clients **can choose** when they want an **active system to stop taking signals** for their account:

All activations on the platform require a **'double check'** of the action and disclosures **before proceeding**

All actions are followed by a **confirmation email** to the **client & broker**.

Balance info including amount required for active systems & remaining buying power

1

Accounts need at least the 'Required Minimum' in their account to activate a system

2

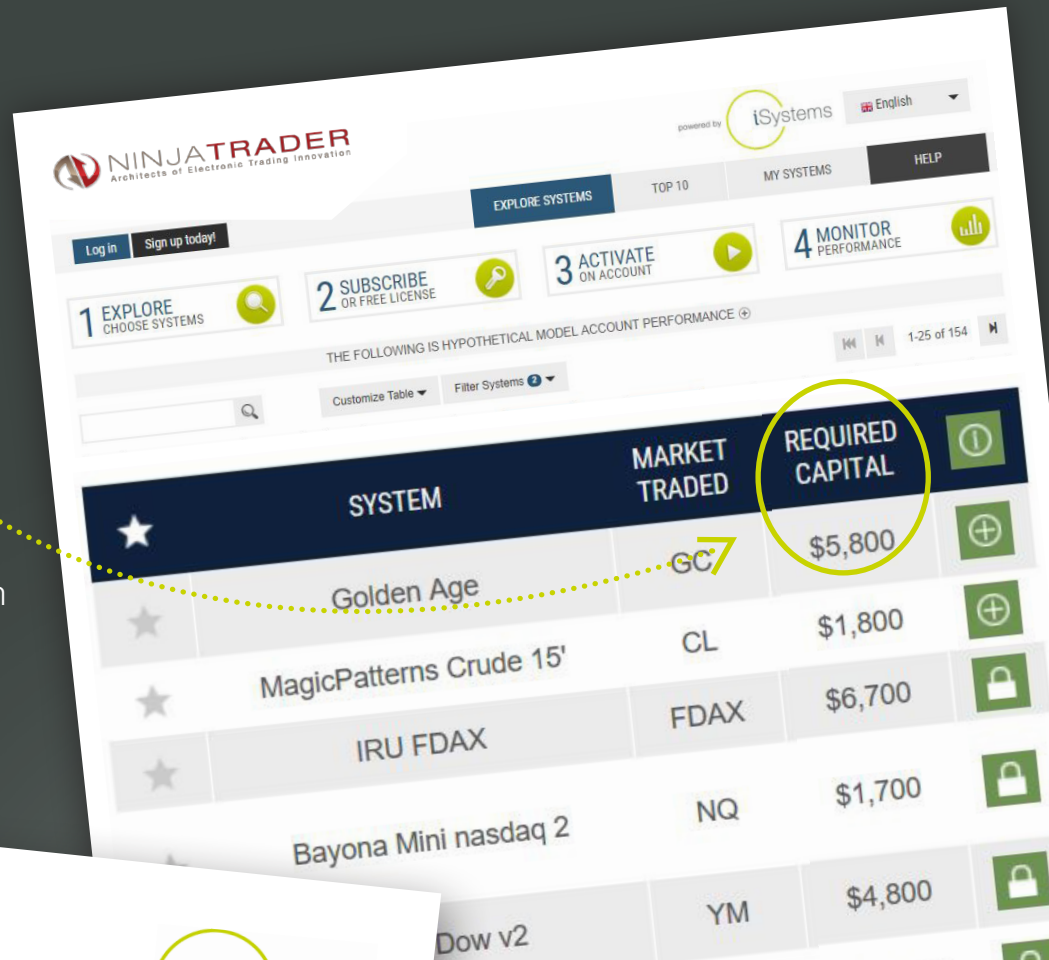

Balances are synced with FCM each day, then updated in real-time based on system P/L

3

Platform automatically de-activates a system when the balance falls below the required minimum, notifying client & broker

4

FCM & CQG risk protocols remain in place as a fail safe

 Cc: Broker Email  
 Subject: System Stopped: BattleQuant Ascender ES

The following system has been DEACTIVATED for your account **21237639** due to insufficient funds to cover the required minimum balance across the system(s) active for your account on the iSystems (by TradingMotion) platform:

System Name	BattleQuant Ascender
Developer	BattleQuant
Market	ES - E-mini S&P Future
System Type	Intraday
Multiplier	1
Deactivation Mode	Stop Immediately
Balance before de-activation	-53 USD
Margin released	2900
Ticket #	178890

This system was selected for deactivation following the risk control procedure specified at the time of activation, and included in the iSystems (by TradingMotion) User Agreement:

"At the start of each trading session, we will verify if your account balance covers all the required minimums for your chosen system(s). If the balance is below what is required, the platform will automatically deactivate systems until the balance meets the required minimum. The priority for systems being deactivated will be those systems with no open positions first, sorted by most recently activated to least recently activated (largest active), and then those systems with open positions, sorted in the same manner."

You may re-activate this system at <https://ninjatrade.isystems.com>, after either adding funds to your account and/or de-activating other systems currently active for your account. Please contact us at (312)262-1289 support or email [systems@ninjatrade.com](mailto:systems@ninjatrade.com) with any questions or for help navigating the platform.
